

INTERNATIONAL PETROLEUM MONTHLY

April 2002

HOW TO OBTAIN EIA PRODUCTS AND SERVICES

For further information on any of the following services, or for answers to energy information questions, please contact EIA's **National Energy Information Center**:

National Energy Information Center (NEIC)	(202) 586-8800
Energy Information Administration	(202) 586-0727 (fax)
Forrestal Building, Room 1F-048	TTY: (202) 586-1181
Washington, DC 20585	E-mail: infoctr@eia.doe.gov

Electronic Products and Services

EIA's **Internet Site Services** offer nearly all EIA publications. Users can view and download selected pages or entire reports, search for information, download EIA data and analysis applications, and find out about new EIA information products and services.

World Wide Web: <http://www.eia.doe.gov>

FTP: <ftp://ftp.eia.doe.gov>

EIA also offers a **listserve** service for EIA press releases and other short documents. Sign up on the EIA World Wide Web site.

EIA's **CD-ROM, Energy InfoDisc**, contains most EIA publications, several databases, and an energy forecasting model. The **Energy InfoDisc**, produced quarterly, is available for a fee from STAT-USA, Department of Commerce, 1-800-STAT-USA.

The **Comprehensive Oil and Gas Information Source (COGIS)**, a bulletin board service, contains data files from most of EIA's oil- and gas-related reports. It is available for a fee from STAT-USA, on 1-800-STAT-USA.

Many of EIA's **data files and modeling programs** are available for sale on diskette, tape, or cartridge, through either the National Technical Information Service or the Office of Scientific and Technical Information, Department of Energy. Contact NEIC for information on specific products, sources, and media, and ordering instructions.

Printed Publications

EIA **directories** are available free of charge from NEIC. Recent **periodicals and one-time reports** are available from the Government Printing Office. Older reports are available from the National Technical Information Service:

Superintendent of Documents
U.S. Government Printing Office
P.O. Box 371954
Pittsburgh, PA 15250-7954
(202) 512-1800; (202)-512-2250 (fax)

National Technical Information Service
U.S. Department of Commerce
5285 Port Royal Road
Springfield, VA 22161
(703) 487-4650; (703) 321-8547 (fax)

Preface

The International Petroleum Monthly is a monthly publication that provides current international oil data. This report is published for the use of Members of Congress, Federal agencies, State agencies, industry, and the general public. Publication of this report is in keeping with responsibilities given the Energy Information Administration in Public Law 95-91 (Section 205(a)(2)) that states:

"The Administrator shall be responsible for carrying out a central, comprehensive, and unified energy data and information program which will collect, evaluate, assemble, analyze and disseminate data and information ..."

The International Petroleum Monthly presents data on international oil production, demand, imports, and stocks. The report has four sections. Section 1 contains time series data on world oil production, and on oil demand and stocks in the Organization for Economic Cooperation and Development (OECD). This section contains annual data beginning in 1990 or 1997, and monthly data for the most recent two years. Section 2 presents an oil supply/demand balance for the world. This balance is presented in quarterly intervals for the most recent two years and annually for the three years prior to that. Section 3 presents data on oil imports by OECD countries. This section contains annual data for the most recent year, quarterly data for the most recent two quarters, and monthly data for the most recent twelve months. Section 4 presents annual time series data on world oil production and oil stocks, demand, and trade in OECD countries. World oil production and OECD demand data are for the years 1970 through 2001; OECD stocks from 1973 through 2000; and OECD trade from 1990 through 2000.

Data for the United States are developed by the Energy Information Administration's (EIA) Office of Oil and Gas. Data for other countries are derived largely from published sources, including International Energy Agency publications, the EIA International Energy Annual, and the trade press. (See sources after each section.) All data are reviewed by the International Energy Statistics Team of EIA. All data have been converted to units of measurement familiar to the American public. Definitions of oil production and consumption are consistent with other EIA publications.

General information about this publication may be obtained from W. Calvin Kilgore, Director, Office of Energy Markets and End Use, (202) 586-1617, and from Louis D. DeMouy, Director, Integrated Energy Statistics Division, (202) 586-8994. Detailed questions and comments concerning the contents of the International Petroleum Monthly may be directed to Patricia A. Smith (202) 586-6925, or Joel Lou (202) 586-1457; Energy Market Chronology - Lowell Feld (202) 586-9502.

Note: Data for the Czech Republic, Hungary, Mexico, Poland, and South Korea have been added to the Organization for Economic Cooperation and Development (OECD) in Figures 3 and 4 and in Tables 1.5 - 1.7, 2.1 - 2.4, 3.1 - 3.6, 3.9, 4.5 - 4.9, 4.12, and 4.16 - 4.18.

Energy Market Chronology - March 2002

The following chronology lists international events that hold significance for world energy markets. Sources include: Associated Press (AP), Dow Jones Business News (DJ), The Los Angeles Times (LAT), The New York Times (NYT), The Oil Daily (OD), Reuters, The Washington Post (WP), and The Wall Street Journal (WSJ).

- March 1** Electricity rationing ends in Brazil after having been in effect since June 2001. Most companies and households were forced to cut electricity usage by 20 percent after a drought seriously reduced hydropower capacity. Brazil is more than 90 percent reliant on hydropower for its electricity consumption. (WSJ)
- March 4** The U.S. Supreme Court upholds rules set by the Federal Energy Regulatory Commission (FERC), which hold that once electric power moves onto interstate transmission lines, it is no longer under a state's regulatory control. This freer market, according to the Court, should "encourage lower electricity rates" and create "competitive bulk power markets." Nine states, including California and New York, had challenged the FERC's right to act in this area. (LAT)
- Strikes and demonstrations over Ecuador's 450,000-barrel-per-day heavy crude oil (OCP) pipeline that is currently under construction, largely from environmental and indigenous groups, come to an end as the government and the pipeline builder agree to provide millions of dollars in local development assistance. The area had lost about 40,000 barrels per day of oil production out of a total of 190,000 barrels per day over a 54-day period from already completed projects that were also blocked, and the pipeline builder lost about \$2 million because of delays. (OD)
- March 5** The United Nations announces that Iraqi oil exports for the previous week rose 1 million barrels per day to 2.49 million barrels per day, taking the four-week average to 1.9 million barrels per day. This is the highest level since November 2001. (Reuters)
- The Energy Ministry of the United Kingdom sets new rules for investment in the country's North Sea oil and natural gas sector. The rules, which are intended to slow declining output, set new investment deadlines on existing licenses, make trading licenses between companies more transparent, and set shorter investment deadlines in new concessions. (Reuters)
- March 6** At a joint news conference, oil ministers of major non-OPEC oil exporters Mexico and Norway announce that they plan to maintain their respective export and production cuts through the end of the second quarter of 2002. This same day, non-OPEC Persian Gulf exporter Oman announces that it is willing to maintain its relatively small production cut through the end of the year. (Reuters)
- March 7** Light, sweet crude oil for April delivery on the NYMEX closes at \$23.71, the highest price since September 21, 2001, when oil prices had temporarily spiked because of the September 11 terrorist attack. Oil prices have been on the rise because of OPEC and non-OPEC production cuts, an improving U.S. economy, and concern over U.S. intentions toward Iraq. (OD)
- March 8** Administrative workers of Venezuela's state oil company PdVSA, who have been holding protests for a week, stage a four-hour work stoppage. The stoppage does not affect exports, but signals rising tensions between PdVSA employees and the government of President Hugo Chavez, who replaced PdVSA's board of directors in February, a move unpopular with employees. (Reuters)
- A team of scientists reports in the journal *Science* that small-scale nuclear fusion has been achieved using a new technique. However, only a minuscule amount of energy is produced and the technique's prospects as a means or step towards using fusion as a practical energy source are still unclear. (NYT)

- March 11** The U.S. Energy Information Administration (EIA) releases the results of its weekly survey of gasoline prices, showing that the average price nationwide rose 7.9 cents per gallon in the previous week. This is the second-highest one-week increase in the past 10 years. Gasoline prices continue rising for the remainder of the month. (LAT)
- Employees at Venezuelan state oil company PdVSA stage a work slowdown, including a halt to overtime work. It is unclear how long the work slowdown will continue. (Reuters)
- March 12** Shareholders of Conoco and Phillips Petroleum approve a proposed \$15.6-billion merger of the two major oil companies. The new company would be the third-largest oil company in the United States and the sixth-largest investor-owned oil company in the world. The company would also be the largest oil refiner in the United States. Joint reserves of the two companies are about 8.7 billion barrels of oil equivalent. (AP)
- March 13** The U.S. Senate rejects a bill that would have raised the Corporate Average Fuel Economy (CAFE) standards from the current 24 miles per gallon to 36 miles per gallon by 2016. Congress last increased fuel economy standards in 1975. (NYT)
- March 15** OPEC oil ministers meeting in Vienna decide to maintain their quota restrictions, established January 1, 2002, through the end of the second quarter of the year. On January 1, 2002, OPEC cut its crude oil production quotas by an aggregate 1.5 million barrels per day. (NYT)
- Syrian Oil Minister Ibrahim Haddad confirms that Syria is receiving Iraqi oil through a pipeline between the two countries. However, the minister states that the pipeline is only being tested and is functioning irregularly due to damage. According to Syria, the pipeline is pumping less than 100,000 barrels per day when at maximum. However, data on Syrian exports loadings for March show an increase of about 115,000 barrels per day. (Reuters)
- California Governor Gray Davis issues an executive order delaying the implementation of a statewide ban on methyl tertiary butyl ether (MTBE) in gasoline for one year. MTBE was to have been banned as of January 1, 2003 because of leakage of the chemical, a possible carcinogen, into the groundwater from underground storage tanks. MTBE is added to gasoline in order to make it burn cleaner in areas susceptible to smog. The alternative to MTBE, ethanol, was viewed by the governor as problematic because suppliers would not be able to adequately replace MTBE with ethanol, creating supply problems and leading to price increases. (OD, WSJ)
- March 16** A summit of European Union (EU) leaders meeting in Barcelona agrees to open the EU's electricity and natural gas markets to competition by 2004. However, after heavy lobbying by France, which still has a completely closed electricity market, the leaders agreed only to require that the market be open for industrial (large) consumers, and not for households. (WSJ, LAT)
- March 17** Venezuelan President Hugo Chavez threatens to have the military take over operations of state oil company PdVSA if the company's operations are halted by a strike. Spokesmen for groups representing employees assert that such a military takeover of the company's operations would not be possible. White-collar PdVSA employees do stage a voluntary one-day strike on March 21, but the company's operations are not seriously affected. (Reuters)
- March 18** NYMEX crude futures settle above \$25 per barrel for the first time since September 26, 2001, with crude oil for April delivery settling at \$25.11 per barrel. Crude oil prices have been rising during the month of March and continue to post six-month highs later in the month. (Reuters)
- March 19** Bulgaria's government announces that it has reached an agreement with Greece for an equal stake with Greece and Russia in a joint company to be set up to manage a planned oil pipeline from the Black Sea to the Aegean Sea. This resolves what had been a key sticking point in negotiations for over six years. The project envisages carrying 700,000 barrels per day of crude oil from the Russian port of Novorossisk by tanker to the Bulgarian Black Sea port of Bourgas, from where the underground pipeline would transfer the oil to the port of Alexandroupolis in northeastern Greece. This would enable crude oil to reach the Mediterranean without having to pass through the congested Bosphorus Strait. (Reuters)

- March 20** Central Gulf Lease Sale 182 takes place, with over 70 companies bidding for oil and natural gas leases in the Gulf of Mexico offshore Louisiana, Mississippi, and Alabama. About \$363 million in high bids are received by the U.S. Minerals Management Service, which managed the sale. The Gulf of Mexico currently accounts for about one-fourth of U.S. oil and natural gas production. (OD)
- Russian Prime Minister Mikhail Kasyanov announces that Russia will extend its voluntary crude oil export cuts of 150,000 barrels per day through the end of the second quarter of 2002. Russia, the biggest non-OPEC oil exporter, had agreed to implement the cuts beginning on January 1, 2002 as a cooperative move with OPEC. Many analysts question whether Russia has complied at all with its pledged cuts, and some data actually points to Russian exports rising since the beginning of January. (NYT)
- March 21** OPEC announces that its members, excluding Iraq, produced 779,000 barrels of crude oil per day above the agreed production quota of 21.7 million barrels per day during the month of February. This is a 65,000-barrel-per-day decline from January's output. (Reuters)
- United Nations (U.N.) Security Council permanent member Russia blocks attempts by other members of the U.N. Sanctions Committee to either set out a stricter pricing mechanism or eliminate middlemen from Iraq's oil trade. The U.N. suspects that many middlemen pay surcharges to the Iraqi government, in violation of U.N. rules. Russian companies have been the largest lifters of Iraqi crude oil since the start of the U.N. "oil-for-food" program. (OD)
- March 22** The U.S. Senate passes a bill that will require utilities to produce 10 percent of their power from renewable energy sources such as wind, solar, and geothermal by 2020. On March 14, the U.S. Senate had rejected a bill that would have required 20 percent of U.S. electricity to be produced from renewable sources by 2020. There are 14 states that already require a percentage of their state's energy to be from renewable sources. (LAT)
- Germany's largest utility, RWE, announces that British power company Innogy has accepted its \$4.42-billion takeover bid. The purchase of Innogy will be RWE's first foothold in a major electricity market outside of Germany. (DJ)
- March 25** Mexican state oil company PEMEX reports that Mexican crude oil exports in February were at 1.575 million barrels per day, well below non-OPEC Mexico's export cap of 1.66 million barrels per day agreed to with OPEC and implemented on January 1, 2002. This is also lower than January's crude oil exports, which were 1.591 million barrels per day, according to PEMEX. (Reuters)
- Oil exports resume at the Turkish port of Ceyhan, following a two-week stoppage that resulted from declining Iraqi exports since the beginning of the month. Iraqi oil exports have been increasingly irregular since after-the-fact pricing was implemented in early 2001. This makes the payment of surcharges to Iraq's government more difficult, but many purchasers now wait until the last few days of the month to load their cargos. (OD)
- Sudanese rebel leader John Garang states that rebels of the Sudan People's Liberation Movement and Army (SPLM/SPLA) will continue to attack oil installations in the center of the country despite an agreement to protect civilians and civilian targets. Sudan produces about 210,000 barrels of oil per day, and exports about 175,000 barrels per day. (Reuters)
- March 26** Angola and Congo (Brazzaville) sign an agreement delineating the countries' maritime border. This allows U.S. major ChevronTexaco to pursue exploration in the formerly disputed border area offshore. The two countries are among Africa's largest oil exporters, with most of that production coming from offshore areas. (OD)
- March 27** At an Arab summit meeting in Beirut, Iraq pledges "non-interference" in Kuwait's internal affairs and recognition of Kuwait's borders. Iraqi Foreign Minister Naji Sabri states, "We are for the prosperity and independence of the state of Kuwait and also for the normalization of ties, diplomatic, economic, political." On March 28, delegates at the meeting endorse a peace plan for Israel/Palestine put forward by the Saudi delegation. (Reuters)
- Royal Dutch/Shell confirms that it will build a \$500 million liquefied natural gas (LNG) regasification terminal in Baja California with a send-out capacity of 1.3

billion cubic feet per day. Shell intends to source LNG for the project from the Asia-Pacific region, and sell it to power plants and other Mexican and Californian consumers. Completion is expected in 2006. (OD)

March 28 A U.S. District Court ruling restricts underground coal mining beneath national parks, inhabited residences, and other protected areas. The court rules in favor of the Citizens Coal Council, an environmental advocacy group, in its suit challenging the way the U.S. Department of the Interior has allowed permitting of underground coal mining that may cause ground subsidence in specified protected areas. The National Mining Association and the U.S. Department of the Interior pledge to appeal the ruling.

The Russian Foreign Ministry reports that it has reached a basic agreement with the United States on revisions of the United Nation's (U.N.) "oil-for-food" program. The draft documents will now be sent forward to the U.N. Security Council for consideration. Of particular importance is that Russia and the United States appear to have reached an agreement concerning a "goods review list" of supplies that cannot be exported to Iraq without approval by the Security Council. (Reuters)

March 29 A U.S. Geological Survey study concludes that opening Alaska's Arctic National Wildlife Refuge to oil drilling could harm caribou and other wildlife. The U.S. Senate will take up debate in April on whether to open the refuge to drilling. (Reuters)

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from January 1990 through July 1990 and beginning again in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. In February 2002, Neutral Zone production by both Kuwait and Saudi Arabia totaled about 596 thousand barrels per day. Data for Saudi Arabia include approximately 150,000 barrels per day from the Abu Safah field, produced on behalf of Bahrain.

Notes: •OPEC=Organization of Petroleum Exporting Countries. •Monthly data are often preliminary and also may not average to the annual totals due to rounding.

¹/ Other is a calculated total derived from the difference between "World" and the sum of production in "Total OPEC" (Table 1.1a) and all other countries listed (Tables 1.1b and 1.1c). The total "North Sea" is not subtracted from the world total, though Norway and the United Kingdom have been subtracted.

-- = Not applicable. R=Revised data. E=Estimated. PE=Preliminary estimate. RE=Revised estimate.

Notes: •Monthly data are often preliminary and also may not average to the annual totals due to rounding. See Section 4 for historical series.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from January 1990 through July 1990 and beginning again in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. In February 2002, Neutral Zone production by both Kuwait and Saudi Arabia totaled about 596 thousand barrels per day. Data for Saudi Arabia include approximately 150,000 barrels per day from the Abu Safah field, produced on behalf of Bahrain.

Notes: •OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

•Monthly data are often preliminary and also may not average to the annual totals due to rounding.

^{1/} Supply includes production of crude oil (including lease condensate), natural gas plant liquids, other hydrogen and hydrocarbons for refinery feedstocks, refinery processing gain, alcohol, and liquids produced from coal and other sources. See Explanatory Note 1 in Appendix B.

^{2/} U.S. geographical coverage is the 50 States and the District of Columbia.

^{3/} The term Demand is used interchangeably with the terms Consumption and Petroleum Products Supplied. See Appendix C for definition. See Appendix B Note 3 for change in demand calculation methodology.

^{4/} Stock draws are positive numbers, stock additions are negative numbers.

^{5/} This is computed as Total Demand minus the sum of Total Supply and Total Reported Stock Draw.

NA=Not available. Note: Sum of components may not equal total due to rounding.

*OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group.

1/ The data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

2/ "Other Europe" consists of Austria, Belgium, Czech Republic, Denmark, Finland, Greece, Hungary, Iceland, Ireland, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, and Turkey.

3/ U.S. geographic coverage is the 50 States and District of Columbia.

4/ "Other" consists of Australia, Mexico, New Zealand, and U. S. Territories.

5/ OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

6/ The Persian Gulf countries are all members of OPEC, except for Bahrain.

Notes: •Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. •OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group. •Negative numbers represent net exports.

•A dash (-) indicates no trade. •Zeroes (.000) indicate net imports of less than 0.0005 million barrels per day. •See Section 4 for annual data.

^{1/} U.S. geographic coverage is the 50 States and District of Columbia.

^{2/} "OECD Europe" consists of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

^{3/} The data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

Notes: •Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. •OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group. •"Persian Gulf" consists of Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates. •Negative numbers represent net exports.

•A dash (-) indicates no trade. •Zeroes (.000) indicate net imports of less than 0.0005 million barrels per day. •See Section 4 for annual data.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1970 through July 1990 and beginning again in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. Data for Saudi Arabia include approximately 150,000 barrels per day from the Abu Safah field, produced on behalf of Bahrain.

P=Preliminary.

¹/ Other is a calculated total derived from the difference between "World" and the sum of production in "Total OPEC" (Table 1.1a) and all other countries listed (Tables 1.1b and 1.1c). The total "North Sea" is not subtracted from the world total, though Norway and the United Kingdom have been subtracted.

-- = Not applicable. P=Preliminary. R=Revised data.

2000	December.....	174	R270	157	103	R1,302	112	634	89	1,468	117	R3,723
2001	December P....	167	269	151	112	1,289	129	634	88	1,585	112	3,838

^{1/} Data through December 1990 are for the former West Germany. Beginning with December 1991, the data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

^{2/} "OECD Europe" consists of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

^{3/} U.S. geographic coverage is the 50 States and the District of Columbia. In the United States in January 1975, 1981, and 1983, numerous respondents were added to bulk terminal and pipeline surveys affecting subsequent stocks reported. Using the new basis, the end-of-year U.S. stocks, in million barrels, would have been 1,121 in 1974, 1,425 in 1980, and 1,461 in 1982.

^{4/} "Other" consists of Australia, Mexico, New Zealand, and the U.S. Territories.

^{5/} There is a discontinuity in the time series between 1996 and 1997. Consistent stock data prior to 1997 are not available for five countries -- Czech Republic, Hungary, Mexico, Poland, and South Korea. Data are available for 1997 forward.

P=Preliminary. NA=Not available. R=Revised data.

Note: Oil Stocks - See Explanatory Note 2 in Appendix B.

Sources: See end of Section 4.

1/ Data are for unified Germany, i.e., the former East Germany and West Germany.

2/ "OECD Europe" consists of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

3/ Data for 1970 - 1992 exclude Czech Republic.

4/ U.S. geographic coverage is the 50 States and the District of Columbia.

5/ "Other" consists of Australia, Mexico, New Zealand, and the U.S. Territories.

P=Preliminary. R=Revised data.

Note: There is a discontinuity in the time series between 1996 and 1997. The term Demand is used interchangeably with Consumption and Petroleum Products Supplied. See Appendix C for definition.

Indonesia.....	.113	.106	.075	.074	.109	.087	.058	.057	.065	.080	.047

1/ OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

2/ The Persian Gulf countries are all members of OPEC, except for Bahrain.

Notes: •Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. •U.S. geographic coverage is the 50 States and District of Columbia. •Negative numbers represent net exports. •A dash (-) indicates no trade.

•Zeroes (.000) indicate net imports of less than 0.0005 million barrels per day. •Data for 2000 are preliminary.

Other OECD Countries: • Organization for Economic Cooperation and Development (OECD), Quarterly Oil Statistics and Energy Balances, various issues. • OECD Monthly Oil Statistics database, 1991-2000.

Appendix A

Organizational and Geographical Definitions

Appendix A. Organizational and Geographical Definitions

International Energy Agency (IEA) countries are: Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States.

Organization for Economic Cooperation and Development (OECD) countries are: Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovakia, South Korea, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States. Total OECD includes the United States Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). Total OECD excludes data for Slovakia which are not yet available.

OECD Europe countries are: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Poland, Portugal, Slovakia, Spain, Sweden, Switzerland, Turkey, and United Kingdom. OECD Europe excludes data for Slovakia which are not yet available.

Organization of Petroleum Exporting Countries (OPEC) members are: Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela. As of December 31, 1992, Ecuador withdrew its membership in OPEC, and as of December 31, 1994, Gabon withdrew its membership. For consistency, Ecuador and Gabon are excluded in the historical series of OPEC totals.

Arab members of OPEC are: Algeria, Iraq, Kuwait, Libya, Qatar, Saudi Arabia and the United Arab Emirates.

Organization of Arab Petroleum Exporting Countries (OAPEC) are: Algeria, Bahrain, Egypt, Iraq, Kuwait, Libya, Neutral Zone, Qatar, Saudi Arabia, Syria, Tunisia, and the United Arab Emirates. In April 1979 Egypt was suspended from OAPEC membership. In May 1989 Egypt rejoined OAPEC. For consistency, Egypt is included in the historical series of the OAPEC totals.

Persian (Arabian) Gulf countries are: Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates.

The term "Former USSR" is being used in the International Petroleum Monthly as a purely geographical expression, referring to the Commonwealth of Independent States (CIS), Georgia, and the three Baltic States (Estonia, Latvia, and Lithuania).

Appendix B

Explanatory Notes

Appendix B. Explanatory Notes

Note 1: World Oil Supply

Supply includes production of crude oil (including lease condensate), natural gas plant liquids, other hydrogen and hydrocarbons for refinery feedstocks, refinery processing gain, alcohol, and liquids produced from coal and other sources. Beginning in 1993, U.S. data includes fuel ethanol blended into finished motor gasoline and oxygenate production from merchant MTBE plants.

Note 2: Oil Stocks

The International Energy Agency (IEA) assembles and reports total oil stock data for the member countries of the Organization for Economic Cooperation and Development (OECD). Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products. In its report titled Oil, Gas, Coal, & Electricity Quarterly Statistics, the IEA defines oil stocks as follows: "All non-military stocks held by importers (including all final consumers directly), refiners, Governments, major non-importing final consumers eligible under IEA/OECD commitments and by foreign entities in the following facilities: bulk terminals, refinery tanks, pipeline tankage, barges, intercoastal tankers (when port of departure and destination are in the reporting country), tankers in port (to the extent that their cargo is to be unloaded in the reporting country), and inland ship bunkers. Oil is reported regardless of the ownership of such storage facilities." IEA data exclude "oil held in pipelines, in rail tank cars, in truck tank cars, in sea-going ships' bunkers, in service stations, retail stores and in tankers at sea." Also the IEA defines the United States to be the 50 States and the District of Columbia, and the U.S. Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). The Energy Information Administration (EIA) does not include the United States Territories in its statistical definition of the United States. Further, the EIA includes oil in oil pipelines as part of its stock data. Tables 1.5, 1.6, 2.3, and 4.5 include oil stocks for the United States according to EIA definitions. Using IEA definitions, at the end of December 2001, United States (including territories) oil stocks totaled 1,430 million barrels.

Oil stock data are collected by the IEA from member governments in OECD countries. However, data for oil stocks for export, oil stocks afloat, and commercial floating oil stocks are not usually available from official national sources. The source of these data is Petroleum Economics Limited, *Oil Industry Developments*.

Data for on land stocks in countries outside the OECD are generally not available.

Note 3: Changes in Oil Demand (Consumption) Data Series

Starting with the November 2001 edition of the *International Petroleum Monthly*, petroleum statistics for 1997 and forward have been recalculated to account for more precise information available from the IEA. The changes in consumption include: enhancements to the accounting of backflows to refineries; the accounting for lubricants; improvements in the conversion factors for changing natural gas liquids and liquefied petroleum gases from metric tons to barrels; and the availability of monthly data for the Czech Republic, Hungary, Mexico, Poland, and South Korea. At this time, EIA does not have sufficiently detailed and consistent information to revise the OECD data series prior to 1997.

The revisions to 1997-2000 annual data for most countries were minor but six countries had changes of 25,000 barrels per day or more in one or more of those years. Italy had the largest revisions as estimated consumption was decreased by more than 125,000 barrels per day for each of the years 1997 through 1999. Canada's consumption was increased by over 80,000 barrels per day for each of the years between 1997 and 2000. South Korea's consumption was decreased in 1997 and 1998 (by 132,000 and

43,000 barrels per day, respectively) and increased in 1999 (by 35,000 barrels per day). Mexico's consumption was increased by 25,000 barrels per day in 1999; and, in 2000, consumption was increased by 37,000 barrels per day in Japan and by 25,000 barrels per day in the United Kingdom.

Though six countries had significant changes in estimated oil demand, the overall estimates of OECD oil demand changed only slightly between data using the older estimation methods and data using the newer estimation methods. The *International Energy Annual (IEA99)* – released in February 2001 – used the older methods. The *International Petroleum Monthly* – released in November 2001 – used the newer methods. Using the newer methods, the data for total OECD oil demand declined by 0.4 percent for 1997, declined by 0.1 percent for 1998, and rose by 0.2 percent for 1999.

Appendix C

Glossary

Appendix C. Glossary

Alcohol: The family name of a group of organic chemical compounds composed of carbon, hydrogen, and oxygen. The series of molecules vary in chain length and are composed of a hydrocarbon plus a hydroxyl group, $\text{CH}_3\text{-}(\text{CH}_2)_n\text{-OH}$. Included are methanol, ethanol, and tertiary butyl alcohol.

Demand (Consumption/Petroleum Products Supplied): Total petroleum products supplied is the sum of all petroleum products supplied. For each product, the amount supplied is calculated by summing production, crude oil burned directly, imports, and net withdrawals from primary stocks and subtracting exports.

Crude Oil: A mixture of hydrocarbons that exists in liquid phase in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface-separating facilities. Depending upon the characteristics of the crude stream, it may also include:

1. Small amounts of hydrocarbons that exist in gaseous phase in natural underground reservoirs but are liquid at atmospheric pressure after being recovered from oil well (casinghead) gas in lease separators and are subsequently commingled with the crude stream without being separately measured. Lease condensate recovered as a liquid from natural gas wells in lease or field separation facilities and later mixed into the crude stream is also included;
2. Small amounts of nonhydrocarbons produced with the oil, such as sulfur and various metals;
3. Drip gases, and liquid hydrocarbons produced from tar sands, Gilsonite, and oil shale.

Government-Owned Stocks: Oil stocks owned by the national government and held for national security. In the United States, these stocks are known as the Strategic Petroleum Reserve.

Lease Condensate: A mixture consisting primarily of pentanes and heavier hydrocarbons which is recovered as a liquid from natural gas in lease separation facilities. This category excludes natural gas plant liquids, such as butane and propane, which are recovered at downstream natural gas processing plants or facilities.

Liquefied Petroleum Gases: A group of hydrogen-based gases derived from crude oil refining or natural gas fractionation. They include ethane, ethylene, propane, propylene, normal butane, butylene, isobutane, and isobutylene. For convenience of transportation, these gases are liquefied through pressurization.

Natural Gas Plant Liquids: Those hydrocarbons in natural gas that are separated as liquids at downstream natural gas processing plants or at fractionating and cycling plants. Data on lease condensate are excluded. Products obtained include liquefied petroleum gases and pentanes plus.

Oil Stocks: Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products stored for future use. See Explanatory Note 2 in Appendix B.

Other Hydrocarbons: Materials received by a refinery and consumed as raw materials. Includes hydrogen, coal tar derivatives, Gilsonite, and natural gas received by the refinery for reforming into hydrogen. Natural gas to be used as fuel is excluded.

Oxygenates: Substances which, when added to gasoline, increase the amount of oxygen in that gasoline blend. Ethanol, Methyl Tertiary Butyl Ether (MTBE), Ethyl Tertiary Butyl Ether (ETBE), and methanol are common oxygenates.

Pentanes Plus: A mixture of hydrocarbons, mostly pentanes and heavier, extracted from natural gas. Includes isopentane, natural gasoline, and plant condensate.

Petroleum Products: Products obtained from the processing of crude oil (including lease condensate), natural gas, and other hydrocarbon compounds. Petroleum products include unfinished oils, liquefied petroleum gases, pentanes plus, aviation gasoline, motor gasoline, naphtha-type jet fuel, kerosene-type jet fuel, kerosene, distillate fuel oil, residual fuel oil, petrochemical feedstocks, special naphthas, lubricants, waxes, petroleum coke, asphalt, road oil, still gas, and other miscellaneous products.

Refinery Processing Gain: The amount by which the total volume of refinery output is greater than the total volume of refinery input for a given period of time. The processing gain arises when crude oil and other hydrocarbons are processed into petroleum products that are, on average, less dense than the input.

Refinery Processing Loss: The amount by which the total volume of refinery output is less than the total volume of refinery input for a given period of time. The processing loss arises when crude oil and other hydrocarbons are processed into petroleum products that are, on average, more dense than the input.

Appendix D

Estimation Procedures

Appendix D. Estimation Procedures

Estimation procedures are used for demand numbers in many of the countries outside of the OECD, in cases where data from EIA's International Energy Annual are not yet available. Demand numbers for 1999 and earlier years, for these countries, may be found in EIA's International Energy Annual 1999, published in February 2001, which is the most recent published edition of the International Energy Annual. EIA's WORLD ENERGY database contains final demand data for these countries for 1998, and preliminary demand data for them for 1999. Instructions for downloading this database may be found on EIA's home page (<http://www.eia.doe.gov/emeu/world/main1.html>). The status of the demand numbers shown in Section 2 of this current International Petroleum Monthly may be summarized as follows.

The OECD demand numbers are, as usual, based on the latest Monthly Oil Statistics data from the International Energy Agency.

For countries outside of the OECD, the following approach is used. The numbers for 1999 and earlier years match the demand numbers in the WORLD ENERGY database on EIA's home page. Numbers for 2000 forward are the best available EIA estimates, based upon the best annual data currently available, analytic judgment about current trends, and some seasonal adjustments. These are the same numbers that appear in the international oil balance table in EIA's Short-Term Energy Outlook.

The two largest non-OECD oil consumers are China and Russia. For these two countries, published data are available on production and net exports. Demand is computed as production minus net exports. This is the same approach used in the Short-Term Energy Outlook, by the International Energy Agency in their Monthly Oil Market Report, and in other major publications dealing with international oil data. Note, however, that because of this computation, the demand numbers for China and Russia implicitly exclude stock draw and refinery gain.

Appendix E

Conversions

Table E1. Refined Petroleum Products Conversion Factors

Product	Barrels per Metric Ton
Distillate Fuel Oil	7.46
Gasoline, Aviation	8.90
Gasoline, Motor	8.45
Jet Fuel, Kerosene-type	7.88
Jet Fuel, Naptha-type	8.25
Kerosene	7.88
Liquefied Petroleum Gas (LPG)	11.60
Miscellaneous Products	8.00
Naphthas	8.90
Natural Gas Liquids (NGL)	10.30
Petroleum Coke	5.50
Residual Fuel Oil	6.45
