

INTERNATIONAL PETROLEUM MONTHLY

May 2002

HOW TO OBTAIN EIA PRODUCTS AND SERVICES

For further information on any of the following services, or for answers to energy information questions, please contact EIA's **National Energy Information Center**:

National Energy Information Center (NEIC)	(202) 586-8800
Energy Information Administration	(202) 586-0727 (fax)
Forrestal Building, Room 1F-048	TTY: (202) 586-1181
Washington, DC 20585	E-mail: infoctr@eia.doe.gov

Electronic Products and Services

EIA's **Internet Site Services** offer nearly all EIA publications. Users can view and download selected pages or entire reports, search for information, download EIA data and analysis applications, and find out about new EIA information products and services.

World Wide Web: <http://www.eia.doe.gov>

FTP: <ftp://ftp.eia.doe.gov>

EIA also offers a **listserve** service for EIA press releases and other short documents. Sign up on the EIA World Wide Web site.

EIA's **CD-ROM, Energy InfoDisc**, contains most EIA publications, several databases, and an energy forecasting model. The *Energy InfoDisc*, produced quarterly, is available for a fee from STAT-USA, Department of Commerce, 1-800-STAT-USA.

The **Comprehensive Oil and Gas Information Source (COGIS)**, a bulletin board service, contains data files from most of EIA's oil- and gas-related reports. It is available for a fee from STAT-USA, on 1-800-STAT-USA.

Many of EIA's **data files and modeling programs** are available for sale on diskette, tape, or cartridge, through either the National Technical Information Service or the Office of Scientific and Technical Information, Department of Energy. Contact NEIC for information on specific products, sources, and media, and ordering instructions.

Printed Publications

EIA **directories** are available free of charge from NEIC. Recent **periodicals and one-time reports** are available from the Government Printing Office. Older reports are available from the National Technical Information Service:

Superintendent of Documents
U.S. Government Printing Office
P.O. Box 371954
Pittsburgh, PA 15250-7954
(202) 512-1800; (202)-512-2250 (fax)

National Technical Information Service
U.S. Department of Commerce
5285 Port Royal Road
Springfield, VA 22161
(703) 487-4650; (703) 321-8547 (fax)

Preface

The International Petroleum Monthly is a monthly publication that provides current international oil data. This report is published for the use of Members of Congress, Federal agencies, State agencies, industry, and the general public. Publication of this report is in keeping with responsibilities given the Energy Information Administration in Public Law 95-91 (Section 205(a)(2)) that states:

"The Administrator shall be responsible for carrying out a central, comprehensive, and unified energy data and information program which will collect, evaluate, assemble, analyze and disseminate data and information ..."

The International Petroleum Monthly presents data on international oil production, demand, imports, and stocks. The report has four sections. Section 1 contains time series data on world oil production, and on oil demand and stocks in the Organization for Economic Cooperation and Development (OECD). This section contains annual data beginning in 1990 or 1997, and monthly data for the most recent two years. Section 2 presents an oil supply/demand balance for the world. This balance is presented in quarterly intervals for the most recent two years and annually for the three years prior to that. Section 3 presents data on oil imports by OECD countries. This section contains annual data for the most recent year, quarterly data for the most recent two quarters, and monthly data for the most recent twelve months. Section 4 presents annual time series data on world oil production and oil stocks, demand, and trade in OECD countries. World oil production and OECD demand data are for the years 1970 through 2001; OECD stocks from 1973 through 2001; and OECD trade from 1991 through 2001.

Data for the United States are developed by the Energy Information Administration's (EIA) Office of Oil and Gas. Data for other countries are derived largely from published sources, including International Energy Agency publications, the EIA International Energy Annual, and the trade press. (See sources after each section.) All data are reviewed by the International Energy Statistics Team of EIA. All data have been converted to units of measurement familiar to the American public. Definitions of oil production and consumption are consistent with other EIA publications.

General information about this publication may be obtained from W. Calvin Kilgore, Director, Office of Energy Markets and End Use, (202) 586-1617, and from Louis D. DeMouy, Director, Integrated Energy Statistics Division, (202) 586-8994. Detailed questions and comments concerning the contents of the International Petroleum Monthly may be directed to Patricia A. Smith (202) 586-6925, or Joel Lou (202) 586-1457; Energy Market Chronology - Lowell Feld (202) 586-9502.

Note: Data for the Czech Republic, Hungary, Mexico, Poland, and South Korea have been added to the Organization for Economic Cooperation and Development (OECD) in Figures 3 and 4 and in Tables 1.5 - 1.7, 2.1 - 2.4, 3.1 - 3.6, 3.9, 4.5 - 4.9, 4.12, and 4.16 - 4.18.

Energy Market Chronology - April 2002

The following chronology lists international events that hold significance for world energy markets. Sources include: Associated Press (AP), Dow Jones Business News (DJ), The Los Angeles Times (LAT), The New York Times (NYT), The Oil Daily (OD), Reuters, The Washington Post (WP), and The Wall Street Journal (WSJ).

- April 1** Iraq calls for an oil embargo by Arab oil exporters to punish the United States and other countries for their support of Israel. This, along with intensification of the Israeli-Palestinian conflict, contributes to oil prices reaching new six-month highs. (Reuters)
- India liberalizes its oil and natural gas sector by putting in place a series of market reforms, including: the end of government-fixed prices for gasoline and diesel; the end of subsidized cooking gas and kerosene prices; market competition for state-run downstream companies; and assigning the Oil Ministry the role of energy watchdog. (Reuters)
- April 2** Royal Dutch/Shell agrees to buy Enterprise Oil for \$5 billion in cash. This will increase Royal Dutch/Shell's production in the North Sea by 30 percent and overall production by 6 percent, according to the company. The acquisition will also add 1.5 billion barrels of oil to Royal Dutch/Shell's reserves. The company is also assuming \$1.15 billion in Enterprise's debt. (NYT)
- April 3** Venezuela sends out its first commercial shipment of 550,000 barrels of synthetic crude to a U.S. Gulf Coast refinery. Venezuela's Sincor heavy crude upgrade plant, which was inaugurated last month, refines ultra-heavy crude oil into 32 degree API syncrude. (Reuters)
- April 4** The Angolan army signs a ceasefire accord with rebels of the National Union for the Total Independence of Angola (Unita). The agreement includes amnesty for former Unita soldiers and their demobilization and reintegration into society. The civil war, which began in 1975, has killed thousands of Angolans and taken much of the government's revenues from Angola's substantial oil production and exports. (NYT)
- April 5** Thousands of workers at Venezuelan state oil company PdVSA stay home, close gates of facilities, and engage in protests. This is the largest disruption of PdVSA's operations in 2002, though it is not a full-blown strike by all PdVSA workers. Oil production and refining slows, and two of Venezuela's five main oil export terminals are unable to operate. The government of President Hugo Chavez threatens to militarize PdVSA's operations. (AP)
- Nigeria's Supreme Court rules that the federal government, not state or regional authorities, has control over offshore oil and natural gas. Six southern states had threatened to take control of natural resources in their territories, which could have meant rules changes for operators in the areas and a concentration in hydrocarbon revenues in those states. (Reuters)
- Iran's supreme leader, Ayatollah Khamenei, joins Iraq in calling for an oil embargo against countries supporting Israel. However, other Iranian government officials indicate that Iran will not go ahead with any embargo without support from all Muslim major oil exporters. On April 7, the Libyan government also calls for an embargo, but with the provision that such an embargo would have to include all Muslim oil exporters. Saudi Arabia and Kuwait reject these proposals. (WP, Reuters)
- April 6** A BP pipeline near Little Lake, Louisiana ruptures, spilling 90,000 gallons of oil into marshland and coastal waters. Clean-up crews are sent to the area and some of the oil is recovered the following day. (WSJ)
- April 7** Venezuelan President Hugo Chavez announces that he has fired seven executives of state oil company Petroleos de Venezuela (PdVSA) and sent 12 others into early retirement. This action comes in response to the executives leading protests and work stoppages that have intensified since April 5. These protests began after President Chavez installed new PdVSA board members on February 20, 2002. (LAT)

- April 8** Nevada Governor Kenny Guinn vetoes the use of the Yucca Mountain facility as a repository for high-level nuclear waste. Under a 1982 federal law on nuclear waste policy, a governor can file a “notice of disapproval” to reject a president’s selection of a site in his state. This gives the U.S. Congress 90 legislative days to debate and vote on the issue. Simple majorities in both chambers can override the veto. (LAT)
- Iraq announces that it will halt its “oil-for-food” exports for 30 days as a “gesture of support” for the Palestinians’ struggle with Israel. Iraq also requests that other OPEC countries do not raise production to make up for lost Iraqi exports. Iraqi “oil-for-food” exports had averaged about 1.7 million barrels per day to date in 2002. Major Arab OPEC exporters Saudi Arabia, Kuwait, and Qatar have expressed unwillingness to join in any embargo. (WSJ)
- April 9** A general strike begins in Venezuela, shutting down many stores and factories and nearly halting oil production, refining, and export terminals. Strike organizers decide to extend the strike through April 10. (WP)
- California Attorney General Bill Lockyer files suit against four power companies, charging them with profiteering during the power crisis of 2000-2001. The attorney general claims that companies could face penalties of as much as \$1 billion. (WSJ)
- April 12** Venezuelan President Hugo Chavez is ousted by the country’s military after three consecutive days of general strikes during which oil production, refining, and exports -- the mainstays of the Venezuelan economy -- were seriously affected. After at least a dozen protesters are killed, high-ranking military officers, including the army commander general, request President Chavez to step down. (WSJ)
- Pedro Carmona is named interim President of Venezuela by the military high command. He dissolves the National Assembly and Supreme Court. PdVSA operations that had been halted start up again, but rioting begins again the following day. (Reuters)
- April 14** Interim President Pedro Carmona announces that he has resigned following large, and sometimes violent, pro-Chavez protests and a lack of support among many military officers. Carmona also loses support of Venezuela’s largest labor group. Several hours later, Hugo Chavez returns to power in Caracas and claims that he never resigned the presidency. Chavez announces that PdVSA’s Board of Directors had submitted its resignation on April 11. (AP)
- April 15** Venezuelan President Hugo Chavez attempts some rapprochement with the employees of PdVSA as oil exports return to normal. PdVSA executives support continued normalization of the company’s operations. Minister of Energy and Mines Alvaro Silva asserts that Venezuela will continue to abide by its OPEC quotas, but the government also asserts that it will be a reliable oil supplier to the United States and will not participate in any oil embargo. (Reuters)
- April 18** El Paso Energy agrees to build, install, own, and operate a production hub platform for the Falcon natural gas field in the U.S. Gulf of Mexico. The field is owned by Pioneer Natural Resources and Mariner Energy. The platform will have an initial capacity of 300 million cubic feet per day, and as a hub eventually will service an additional nine blocks in the area. A 20-mile natural gas pipeline will link the development to an offshore natural gas gathering system. (OD)
- April 19** A Venezuelan government spokesman announces that OPEC Secretary General Ali Rodriguez will quit this position in order to become the new president of PdVSA. It is not clear who will succeed Mr. Rodriguez as OPEC Secretary General at this time. (DJ)
- April 22** National Grid Group, which runs Britain’s power transmission network, announces that it plans to merge with Lattice Group in a stock deal worth \$9.7 billion. Lattice is a natural gas pipeline operator that was spun off from British Gas. National Grid will also assume \$10 billion of Lattice’s debt under the plan. This creates one firm with significant power over Britain’s natural gas and electricity networks. The new company will be the UK’s largest utility. (DJ)

- April 22** California State officials announce that California has renegotiated \$15 billion in power contracts with five of 12 companies with which the State has contracts. As a result of the restructuring, the State will lower costs by about \$3.5 billion over the decade. These long-term contracts were signed during the height of the power crisis of 2000-2001, locking in what many State officials now consider higher-than-market rates for electricity. The companies that have renegotiated extricate themselves from possible legal action on the part of California in the future. (LAT)
- The government of Venezuela and executives of PdVSA agree on a new board of directors for the state oil company. Recent protests and strikes by PdVSA managers and employees that led up to President Chavez's temporary ouster on April 12 began in response to a board of directors appointed by President Chavez on February 20. (Reuters)
- Russian Finance Minister Alexei Kudrin announces that Russia will not extend the 150,000-barrel-per-day crude oil export cut it has promised OPEC beyond the end of June 2002. Data from several sources, including Russia itself, appear to cast doubt on whether Russian exports were ever reduced since the cuts were supposed to become effective January 1, 2002. (Reuters)
- Russia's largest oil producer, OAO Lukoil, unveils a restructuring plan that aims to double the company's output by 2010. In addition to investments in new fields, the company also plans to increase output by outsourcing its drilling and well-management to oil services companies. The company plans to increase production 20 percent this year alone, to 1.4 million barrels per day. (WSJ)
- April 24** A summit of the leaders of the five littoral states of the Caspian Sea ends without an agreement on how to divide the Caspian's resources between the five countries. (Reuters)
- April 25** The U.S. Senate passes an energy bill that differs substantially from the version passed by the U.S. House of Representatives in August 2001. The Senate version, for instance, has no provision for oil exploration in the Arctic National Wildlife Refuge. Another provision of the bill would require that companies gradually increase the percentage of electricity that they generate from renewable sources. The bill now goes to conference. (NYT, Reuters)
- April 25** President George W. Bush and Saudi Crown Prince Abdullah meet in Crawford, Texas. The main topic of discussion is how to arrive at a resolution of the Israeli-Palestinian conflict. Also today, Saudi officials deny fresh reports that they will reduce oil exports to express displeasure with U.S. policy toward the Middle East. Oil prices rise substantially on the rumor, but fall after denials by U.S. and Saudi officials. (WP)
- April 29** An investigating panel of the Senate Governmental Affairs Committee issues a report on gasoline price and the degree of market concentration of refiners and retailers. The report states that, "In a number of instances, refiners have sought to increase prices by reducing supply." The American Petroleum Institute and several oil refiners and retailers have contested the report's conclusions. (DJ)

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from January 1990 through July 1990 and beginning again in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. In March 2002, Neutral Zone production by both Kuwait and Saudi Arabia totaled about 580 thousand barrels per day. Data for Saudi Arabia include approximately 150,000 barrels per day from the Abu Safah field, produced on behalf of Bahrain.

Notes: •OPEC=Organization of Petroleum Exporting Countries. •Monthly data are often preliminary and also may not average to the annual totals due to rounding.

Sources: See end of Section 1.

¹/ Other is a calculated total derived from the difference between "World" and the sum of production in "Total OPEC" (Table 1.1a) and all other countries listed (Tables 1.1b and 1.1c). The total "North Sea" is not subtracted from the world total, though Norway and the United Kingdom have been subtracted.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from January 1990 through July 1990 and beginning again in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. In March 2002, Neutral Zone production by both Kuwait and Saudi Arabia totaled about 580 thousand barrels per day. Data for Saudi Arabia include approximately 150,000 barrels per day from the Abu Safah field, produced on behalf of Bahrain.

Notes: •OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

•Monthly data are often preliminary and also may not average to the annual totals due to rounding.

^{1/} U.S. geographic coverage is the 50 States and the District of Columbia. Beginning in 1993, includes fuel ethanol blended into finished motor gasoline and oxygenate production from merchant MTBE plants.

^{2/} See Appendix A for countries in this group.

^{3/} OAPEC=Organization of Arab Petroleum Exporting Countries. OPEC=Organization of Petroleum Exporting Countries.

See Appendix A for countries in these groups.

R=Revised data. E=Estimated. PE=Preliminary estimate. RE=Revised estimate.

Notes: •Oil Supply includes crude oil, natural gas plant liquids, other liquids, and refinery processing gain. See Explanatory Note 1 in Appendix B. •Monthly data are often preliminary and also may not average to the annual total due to rounding.

See Section 4 for historical series.

Sources: See end of Section 1.

1/ U.S. geographic coverage is the 50 States and the District of Columbia.

2/ North Sea includes the United Kingdom Offshore, Norway, Denmark, Netherlands Offshore, and Germany Offshore.

NA=Not available.

Notes: •Supply includes crude oil (including lease condensate), natural gas plant liquids (except for individual OPEC countries), other hydrogen and hydrocarbons for refinery feedstocks, alcohol, liquids produced from coal and other sources, and refinery processing gain (except for individual OPEC countries). For OPEC, natural gas plant liquids production and refinery processing gain are shown as separate lines. •Sum of components may not equal total due to rounding.

•OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group.

1/ The data for Germany are for unified Germany, i.e., the former East Germany and West Germany.

2/ "Other Europe" consists of Austria, Belgium, Czech Republic, Denmark, Finland, Greece, Hungary, Iceland, Ireland, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, and Turkey.

3/ U.S. geographic coverage is the 50 States and District of Columbia.

4/ "Other" consists of Australia, Mexico, New Zealand, and U. S. Territories.

5/ OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

6/ The Persian Gulf countries are all members of OPEC, except for Bahrain.

Notes: •Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. •OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group. •Negative numbers represent net exports.

•A dash (-) indicates no trade. •Zeroes (.000) indicate net imports of less than 0.0005 million barrels per day. •See Section 4 for annual data.

Sources: See end of Section 3.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1970 through July 1990 and beginning again in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. Data for Saudi Arabia include approximately 150,000 barrels per day from the Abu Safah field, produced on behalf of Bahrain.

P=Preliminary.

Notes: •OPEC=Organization of Petroleum Exporting Countries.

¹/ Other is a calculated total derived from the difference between "World" and the sum of production in "Total OPEC" (Table 1.1a) and all other countries listed (Tables 1.1b and 1.1c). The total "North Sea" is not subtracted from the world total, though Norway and the United Kingdom have been subtracted.

^{1/} Includes about one-half of the production in the Kuwait-Saudi Arabia Neutral Zone from 1980 through July 1990 and beginning again in June 1991. Kuwaiti Neutral Zone output was discontinued following Iraq's invasion of Kuwait on August 2, 1990, but was resumed in June 1991. From August 1990 through May 1991, all production in the Neutral Zone was included in the data for Saudi Arabia. Data for Saudi Arabia include approximately 150,000 barrels per day from the Abu Safah field, produced on behalf of Bahrain.

P=Preliminary.

Note: OPEC=Organization of Petroleum Exporting Countries. See Appendix A for Countries in this group.

^{1/} Data through December 1990 are for the former West Germany. Beginning with December 1991, the data for Germany are for the unified Germany, i.e., the former East Germany and West Germany.

^{2/} "OECD Europe" consists of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

^{3/} U.S. geographic coverage is the 50 states and the District of Columbia. In the United States in January 1975, 1981, and 1983, numerous respondents were added to bulk terminal and pipeline surveys affecting subsequent stocks reported. Using the new basis, the end-of-year U.S. stocks, in million barrels, would have been 1,121 in 1974, 1,425 in 1980, and 1,461 in 1982.

^{4/} "Other" consists of Australia, Mexico, New Zealand, and the U.S. Territories.

^{5/} There is a discontinuity in the time series between 1996 and 1997. Consistent stock data prior to 1997 are not available for five countries -- Czech Republic, Hungary, Mexico, Poland, and South Korea. Data are available for 1997 forward.

P=Preliminary. NA=Not available. R=Revised data.

Note: Oil Stocks - See Explanatory Note 2 in Appendix B.

Sources: See end of Section 4.

1/ Data for 1990-1992 exclude Czech Republic.

2/ OPEC=Organization of Petroleum Exporting Countries. See Appendix A for countries in this group.

3/ Data for 1990-1996 exclude Czech Republic, Hungary, and Poland.

4/ The Persian Gulf countries are all members of OPEC, except for Bahrain.

Notes: •Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. •"OECD Europe" consists of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom. •Negative numbers represent net exports.

•A dash (-) indicates no trade. •Zeroes (.000) indicate net imports of less than 0.0005 million barrels per day. •Data for 2000 are preliminary.

1/ Data for 1990-1996 exclude Czech Republic, Hungary, Mexico, Poland, and South Korea.

2/ U.S. geographic coverage is the 50 States and District of Columbia.

3/ "OECD Europe" consists of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

4/ Data for 1990-1996 exclude Czech Republic, Hungary, and Poland.

5/ Data for 1990 are for the former West Germany only.

6/ Data for 1990-1996 are not available.

Notes: •Imports include crude oil, natural gas liquids, and refined products, and are on a direct basis. •OECD=Organization for Economic Cooperation and Development. See Appendix A for countries in this group. •Negative numbers represent net exports.

•A dash (-) indicates no trade. •Zeroes (.000) indicate net imports of less than 0.0005 million barrels per day. •Data for 2000 are preliminary.

Sources: See end of Section 4.

Appendix A

Organizational and Geographical Definitions

Appendix A. Organizational and Geographical Definitions

International Energy Agency (IEA) countries are: Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States.

Organization for Economic Cooperation and Development (OECD) countries are: Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovakia, South Korea, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States. Total OECD includes the United States Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). Total OECD excludes data for Slovakia which are not yet available.

OECD Europe countries are: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Poland, Portugal, Slovakia, Spain, Sweden, Switzerland, Turkey, and United Kingdom. OECD Europe excludes data for Slovakia which are not yet available.

Organization of Petroleum Exporting Countries (OPEC) members are: Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, the United Arab Emirates, and Venezuela. As of December 31, 1992, Ecuador withdrew its membership in OPEC, and as of December 31, 1994, Gabon withdrew its membership. For consistency, Ecuador and Gabon are excluded in the historical series of OPEC totals.

Arab members of OPEC are: Algeria, Iraq, Kuwait, Libya, Qatar, Saudi Arabia and the United Arab Emirates.

Organization of Arab Petroleum Exporting Countries (OAPEC) are: Algeria, Bahrain, Egypt, Iraq, Kuwait, Libya, Neutral Zone, Qatar, Saudi Arabia, Syria, Tunisia, and the United Arab Emirates. In April 1979 Egypt was suspended from OAPEC membership. In May 1989 Egypt rejoined OAPEC. For consistency, Egypt is included in the historical series of the OAPEC totals.

Persian (Arabian) Gulf countries are: Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Arab Emirates.

The term "Former USSR" is being used in the International Petroleum Monthly as a purely geographical expression, referring to the Commonwealth of Independent States (CIS), Georgia, and the three Baltic States (Estonia, Latvia, and Lithuania).

Appendix B

Explanatory Notes

Appendix B. Explanatory Notes

Note 1: World Oil Supply

Supply includes production of crude oil (including lease condensate), natural gas plant liquids, other hydrogen and hydrocarbons for refinery feedstocks, refinery processing gain, alcohol, and liquids produced from coal and other sources. Beginning in 1993, U.S. data includes fuel ethanol blended into finished motor gasoline and oxygenate production from merchant MTBE plants.

Note 2: Oil Stocks

The International Energy Agency (IEA) assembles and reports total oil stock data for the member countries of the Organization for Economic Cooperation and Development (OECD). Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products. In its report titled [Oil, Gas, Coal, & Electricity Quarterly Statistics](#), the IEA defines oil stocks as follows: "All non-military stocks held by importers (including all final consumers directly), refiners, Governments, major non-importing final consumers eligible under IEA/OECD commitments and by foreign entities in the following facilities: bulk terminals, refinery tanks, pipeline tankage, barges, intercoastal tankers (when port of departure and destination are in the reporting country), tankers in port (to the extent that their cargo is to be unloaded in the reporting country), and inland ship bunkers. Oil is reported regardless of the ownership of such storage facilities." IEA data exclude "oil held in pipelines, in rail tank cars, in truck tank cars, in sea-going ships' bunkers, in service stations, retail stores and in tankers at sea." Also the IEA defines the United States to be the 50 States and the District of Columbia, and the U.S. Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). The Energy Information Administration (EIA) does not include the United States Territories in its statistical definition of the United States. Further, the EIA includes oil in oil pipelines as part of its stock data. Tables 1.5, 1.6, 2.3, and 4.5 include oil stocks for the United States according to EIA definitions. Using IEA definitions, at the end of December 2001, United States (including territories) oil stocks totaled 1,430 million barrels.

Oil stock data are collected by the IEA from member governments in OECD countries. However, data for oil stocks for export, oil stocks afloat, and commercial floating oil stocks are not usually available from official national sources. The source of these data is Petroleum Economics Limited, *Oil Industry Developments*.

Data for on land stocks in countries outside the OECD are generally not available.

Note 3: Changes in Oil Demand (Consumption) Data Series

Starting with the November 2001 edition of the *International Petroleum Monthly*, petroleum statistics for 1997 and forward have been recalculated to account for more precise information available from the IEA. The changes in consumption include: enhancements to the accounting of backflows to refineries; the accounting for lubricants; improvements in the conversion factors for changing natural gas liquids and liquefied petroleum gases from metric tons to barrels; and the availability of monthly data for the Czech Republic, Hungary, Mexico, Poland, and South Korea. At this time, EIA does not have sufficiently detailed and consistent information to revise the OECD data series prior to 1997.

The revisions to 1997-2000 annual data for most countries were minor but six countries had changes of 25,000 barrels per day or more in one or more of those years. Italy had the largest revisions as estimated consumption was decreased by more than 125,000 barrels per day for each of the years 1997 through 1999. Canada's consumption was increased by over 80,000 barrels per day for each of the years between 1997 and 2000. South Korea's consumption was decreased in 1997 and 1998 (by 132,000 and

43,000 barrels per day, respectively) and increased in 1999 (by 35,000 barrels per day). Mexico's consumption was increased by 25,000 barrels per day in 1999; and, in 2000, consumption was increased by 37,000 barrels per day in Japan and by 25,000 barrels per day in the United Kingdom.

Though six countries had significant changes in estimated oil demand, the overall estimates of OECD oil demand changed only slightly between data using the older estimation methods and data using the newer estimation methods. The *International Energy Annual (IEA99)* – released in February 2001 – used the older methods. The *International Petroleum Monthly* – released in November 2001 – used the newer methods. Using the newer methods, the data for total OECD oil demand declined by 0.4 percent for 1997, declined by 0.1 percent for 1998, and rose by 0.2 percent for 1999.

Appendix C

Glossary

Appendix C. Glossary

Alcohol: The family name of a group of organic chemical compounds composed of carbon, hydrogen, and oxygen. The series of molecules vary in chain length and are composed of a hydrocarbon plus a hydroxyl group, $\text{CH}_3\text{-}(\text{CH}_2)_n\text{-OH}$. Included are methanol, ethanol, and tertiary butyl alcohol.

Demand (Consumption/Petroleum Products Supplied): Total petroleum products supplied is the sum of all petroleum products supplied. For each product, the amount supplied is calculated by summing production, crude oil burned directly, imports, and net withdrawals from primary stocks and subtracting exports.

Crude Oil: A mixture of hydrocarbons that exists in liquid phase in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface-separating facilities. Depending upon the characteristics of the crude stream, it may also include:

1. Small amounts of hydrocarbons that exist in gaseous phase in natural underground reservoirs but are liquid at atmospheric pressure after being recovered from oil well (casinghead) gas in lease separators and are subsequently commingled with the crude stream without being separately measured. Lease condensate recovered as a liquid from natural gas wells in lease or field separation facilities and later mixed into the crude stream is also included;
2. Small amounts of nonhydrocarbons produced with the oil, such as sulfur and various metals;
3. Drip gases, and liquid hydrocarbons produced from tar sands, Gilsonite, and oil shale.

Government-Owned Stocks: Oil stocks owned by the national government and held for national security. In the United States, these stocks are known as the Strategic Petroleum Reserve.

Lease Condensate: A mixture consisting primarily of pentanes and heavier hydrocarbons which is recovered as a liquid from natural gas in lease separation facilities. This category excludes natural gas plant liquids, such as butane and propane, which are recovered at downstream natural gas processing plants or facilities.

Liquefied Petroleum Gases: A group of hydrogen-based gases derived from crude oil refining or natural gas fractionation. They include ethane, ethylene, propane, propylene, normal butane, butylene, isobutane, and isobutylene. For convenience of transportation, these gases are liquefied through pressurization.

Natural Gas Plant Liquids: Those hydrocarbons in natural gas that are separated as liquids at downstream natural gas processing plants or at fractionating and cycling plants. Data on lease condensate are excluded. Products obtained include liquefied petroleum gases and pentanes plus.

Oil Stocks: Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products stored for future use. See Explanatory Note 2 in Appendix B.

Other Hydrocarbons: Materials received by a refinery and consumed as raw materials. Includes hydrogen, coal tar derivatives, Gilsonite, and natural gas received by the refinery for reforming into hydrogen. Natural gas to be used as fuel is excluded.

Oxygenates: Substances which, when added to gasoline, increase the amount of oxygen in that gasoline blend. Ethanol, Methyl Tertiary Butyl Ether (MTBE), Ethyl Tertiary Butyl Ether (ETBE), and methanol are common oxygenates.

Pentanes Plus: A mixture of hydrocarbons, mostly pentanes and heavier, extracted from natural gas. Includes isopentane, natural gasoline, and plant condensate.

Petroleum Products: Products obtained from the processing of crude oil (including lease condensate), natural gas, and other hydrocarbon compounds. Petroleum products include unfinished oils, liquefied petroleum gases, pentanes plus, aviation gasoline, motor gasoline, naphtha-type jet fuel, kerosene-type jet fuel, kerosene, distillate fuel oil, residual fuel oil, petrochemical feedstocks, special naphthas, lubricants, waxes, petroleum coke, asphalt, road oil, still gas, and other miscellaneous products.

Refinery Processing Gain: The amount by which the total volume of refinery output is greater than the total volume of refinery input for a given period of time. The processing gain arises when crude oil and other hydrocarbons are processed into petroleum products that are, on average, less dense than the input.

Refinery Processing Loss: The amount by which the total volume of refinery output is less than the total volume of refinery input for a given period of time. The processing loss arises when crude oil and other hydrocarbons are processed into petroleum products that are, on average, more dense than the input.

Appendix D

Estimation Procedures

Appendix D. Estimation Procedures

Estimation procedures are used for demand numbers in many of the countries outside of the OECD, in cases where data from EIA's International Energy Annual are not yet available. Demand numbers for 1999 and earlier years, for these countries, may be found in EIA's International Energy Annual 1999, published in February 2001, which is the most recent published edition of the International Energy Annual. EIA's WORLD ENERGY database contains final demand data for these countries for 1998, and preliminary demand data for them for 1999. Instructions for downloading this database may be found on EIA's home page (<http://www.eia.doe.gov/emeu/world/main1.html>). The status of the demand numbers shown in Section 2 of this current International Petroleum Monthly may be summarized as follows.

The OECD demand numbers are, as usual, based on the latest Monthly Oil Statistics data from the International Energy Agency.

For countries outside of the OECD, the following approach is used. The numbers for 1999 and earlier years match the demand numbers in the WORLD ENERGY database on EIA's home page. Numbers for 2000 forward are the best available EIA estimates, based upon the best annual data currently available, analytic judgment about current trends, and some seasonal adjustments. These are the same numbers that appear in the international oil balance table in EIA's Short-Term Energy Outlook.

The two largest non-OECD oil consumers are China and Russia. For these two countries, published data are available on production and net exports. Demand is computed as production minus net exports. This is the same approach used in the Short-Term Energy Outlook, by the International Energy Agency in their Monthly Oil Market Report, and in other major publications dealing with international oil data. Note, however, that because of this computation, the demand numbers for China and Russia implicitly exclude stock draw and refinery gain.

Appendix E

Conversions

Table E1. Refined Petroleum Products Conversion Factors

Product	Barrels per Metric Ton
Distillate Fuel Oil	7.46
Gasoline, Aviation	8.90
Gasoline, Motor	8.45
Jet Fuel, Kerosene-type	7.88
Jet Fuel, Naptha-type	8.25
Kerosene	7.88
